Question N.3: What is the primary purpose of a dot plot?

- | |
|---|
| A. To group data into large intervals and hide individual values. |
| B. To calculate the exact average of a data set without using numbers. |
| C. To display the distribution of a data set where each data value is shown as a dot above a number line. |
| D. To show the relationship between two different variables. |

Question N.7: Find the median of the following data set: {12, 5, 9, 20, 15}

A. 15
B. 12
C. 61
D. 9

Question N.8: In a box plot, what value represents the Lower Quartile (Q1)?

A. The median of the lower half of the data.
B. The median of the entire data set.
C. The smallest number in the set.
D. The average of all numbers.

Question N.9: If all the numbers in a data set are the same (e.g., {7, 7, 7, 7}), what is the range?

A. 0
B. 7
C. 14
D. 1

**Question N.10: Data Set A has a MAD of 1.2 and Data Set B has a MAD of 4.5.
Which set is more consistent?**

A. It depends on the mean of the sets.
B. Data Set B
C. Data Set A
D. They are equally consistent.

Question N.11: Find the MAD for the set {8,9,10,11,12}.

A. 1
B. 4
C. 2
D. 10

Question N.12: Which measure of center is MOST affected by an extreme outlier?

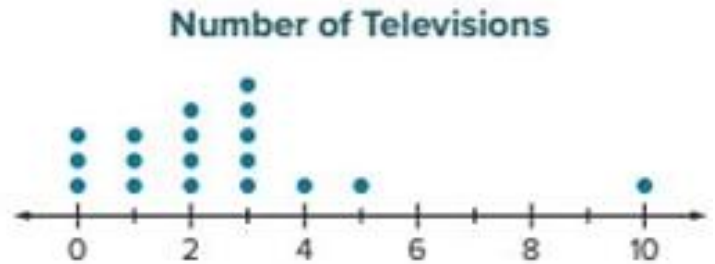

A. Median
B. Mean
C. Mode
D. Range

Question N.13: Joakim spent 40, 25, 60, 30, 35, and 40 minutes practicing the piano last week. Identify the outlier in this data set.

- | |
|--|
| A. 25 |
| B. There are no outliers in this data set. |
| C. 60 |
| D. 40 |

Question N.14: The dot plot shows the number of televisions owned by 18 families. Given the presence of an outlier at 10, which measures of center and variation best describe this data set?

- | |
|--|
| A. Median and Interquartile Range (IQR). |
| B. Mean and Interquartile Range (IQR). |
| C. Mean and Mean Absolute Deviation (MAD). |
| D. Median and Range. |

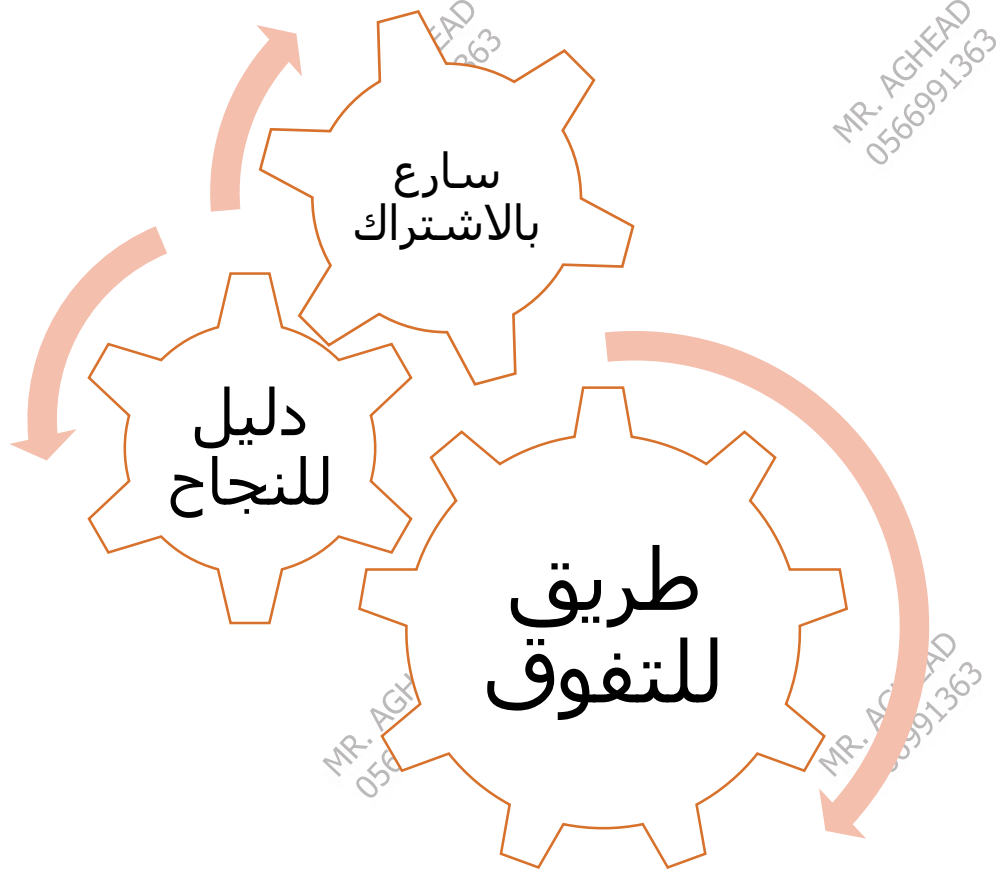

Question N.15: Based on the histogram of pumpkin weights, a student claims that more than 25% of the pumpkins weigh 20 pounds or more. Is the student correct?

- A. Yes, because 25% of 40 is 10, and there are more than 10 pumpkins.
- B. Yes, because there are 6 pumpkins in that category out of 40 total.
- C. No, because only 15% of the pumpkins weigh 20 pounds or more.
- D. No, because the average weight is less than 20 pounds.
